

Health checks > 72b0766-10ca-47a7-8268-25e1a11530b5

Configure health check 0

Route 53 health checks let you track the health status of your resources, such as web servers or mail servers, and take action when an outage occurs.

Name  0

What to monitor Endpoint

Monitor an endpoint

Multiple Route 53 health checkers will try to establish a TCP connection with the following resource to determine whether it's healthy. [Learn more](#)

Specify endpoint by IP address

Protocol HTTP 0

IP address  0

Host name  0

Port  0

Path  0
